

Manipulating DOM

Manipulating DOM

content

```
.text()  
.text("new text")  
.html()  
.html("<em>new html</em>")
```

attributes

```
.attr("width")  
.attr("width", "200px")  
.css("border", "1px")
```

classes

```
.hasClass("starred")  
.addClass("starred")  
.removeClass("starred")  
.toggleClass("starred")
```

Manipulating DOM

HTML5 data

```
.data('counter')  
.data('counter', "1")
```

positions

```
.offset()  
.width()  
.height()
```

form values

```
.val()  
.val("new value")  
.prop("selected")  
.prop("selected", true)  
.serialize()
```

Manipulating DOM

insert

- `append("<p>new p</p>")`
- `prepend("<p>new p</p>")`
- `after("new li")`
- `before("new li")`

wrapping

- `wrap('<div class="myClass">')`
- `unwrap()`
- `wrapInner("")`
- `wrapAll("<section>")`

copying

- `clone()`

remove

- `remove()`
